Brief Summary

- A Tech enthusiast with skills in web development, Python, and SQL. Experienced in creating user-friendly applications using HTML, CSS, and Docker. Skilled in solving problems, testing APIs, and using object-oriented programming. Eager to contribute to software development projects.

Education

Sri Sivasubramaniya Nadar College of Engineering (SSN) <i>B.Tech. in Information Technology</i>	2021 – 2025
Vivekananda Higher Secondary School, Namakkal <i>12th Grade (TN State Board)</i>	2021
Sivabakkiam Muthusamy Matric Higher Secondary School, Namakkal <i>10th Grade (TNBSE)</i>	2019

Internships

CoderOne <i>Web Developer</i>	Jun 2024 – Jul 2024
– Developed and designed responsive and user-friendly interfaces for a job board and an online quiz maker.	

Projects

Jewelry Image Classification	2024
– Skills: Machine learning, SVM, Python, Yolo, Roboflow, ReactJS	
– Developed an ML-based classification system to categorize gold chains using SVM, YOLO, and Roboflow, achieving 95 accuracy in identifying beads, pearls, stones, and tassels.	
– Implemented machine learning models with Python and built a ReactJS interface for seamless industrial application, improving efficiency in jewelry classification.	
PG Accommodation System	2024
– Skills: HTML, CSS, JavaScript, PHP, MySQL, XAMPP, Priority Queue, Splay Tree, Git, GitHub	
– Developed a web-based PG Accommodation Management System with property listings, search filters, booking system, and payment integration.	
Automatic Resume Analyzer	2024
– Skills: Python, Flask, NLTK, spaCy, Pyresparser, MySQL, Named Entity Recognition (NER), Keyword Matching, Git, GitHub, Docker	
– Developed an AI-powered Resume Analyzer to streamline candidate screening. Features include resume parsing, keyword matching, skill evaluation, and ranking system.	

Skills

- **Languages:** Python, JavaScript, PHP, MySQL
- **Concepts:** Data Structures, Object-Oriented Programming
- **Web Development:** HTML, CSS
